April 6, 2004

The Head Piece has a square shape with a wedge insert that would span the vertical length of the pillow, covered by open foam and conventional pillow stuffing. The Torso Wedge Pillow is circular and cylindrically shaped, with an opposing wedge piece extending from the shoulder to the hip crest. The exterior covering will be conventional pillow cover material. The two pillows could connect or can remain a two-piece pillow.

With the customer in the prone position greater comfort and rest will result by using these pillows. This pillow is designed to specifically target and eliminate excess neck rotation and stress when sleeping in the prone position.

Sincerely,

Dr. Joseph Chisari
